2011	146,785	4,282	379,927	11,092	2025	108,044	2,905	302,652†	8,028†
Total, March supplements 1998–2025: **3,607,763** persons, **103,820** teachers									

Notes: Distinct adults (18+), each counted once per survey year. *ASEC*: respondents of the March supplement — the March sample plus the February–April oversamples — who answer the retrospective questions once each. *12 months*: distinct people appearing in that year's twelve basic monthly files; the CPS interviews each household in four consecutive months twice over two years, so a person is interviewed about three times per calendar year. Monthly microdata from 2005; †2025 covers eleven months. Teachers: longest job last year was school teaching (ASEC); employed in a school-teaching occupation at a monthly interview (monthly files).

Table B2 — Monthly interviews by panel status: new, returning and repeated respondents

	2006				2015					
	New	This yr	Last yr	Total	New	This yr	Last yr	Total	New	This y

Sum	203,820	839,825	178,187	1,221,832	216,130	821,894	165,838	1,203,862	167,609	634,65
Distinct persons				**382,007**				**381,968**		
March supplement (ASEC)				**145,752**				**144,279**		

Notes: Adults (18+) per basic monthly file. *New*: first interview ever; *This yr*: already interviewed in an earlier month of the calendar year; *Last* interviewed the previous year (first appearance this year). Within a month the three sum to the Total; over the year, New + Last yr counts each equals the distinct persons. The March supplement interviews each person once: the March respondents plus the February–April oversamples, abo
