| Total, March supplements 1998–2025: **3,607,763** persons, **103,820** teachers | | | | | | | | | |

*Notes:* Distinct adults (18+), each counted once per survey year. *ASEC*: respondents of the March supplement — the March sample plus the February–April oversamples — who answer the retrospective questions once each. *12 months*: distinct people appearing in that year's twelve basic monthly files; the CPS interviews each household in four consecutive months twice over two years, so a person is interviewed about three times per calendar year. Monthly microdata from 2005; †2025 covers eleven months. Teachers: longest job last year was school teaching (ASEC); employed in a school-teaching occupation at a monthly interview (monthly files).

**Table B2 — Monthly interviews by panel status: new, returning and repeated respondents**

| Distinct persons | | | | **382,007** | | | | **381,968** | | | | **310,239** |
| March supplement (ASEC) | | | | **145,752** | | | | **144,279** | | | | **109,367** |

*Notes:* Adults (18+) per basic monthly file. *New*: first interview ever; *This yr*: already interviewed in an earlier month of the calendar year; *Last yr*: returning after being interviewed the previous year (first appearance this year). Within a month the three sum to the Total; over the year, New + Last yr counts each person exactly once and equals the distinct persons. The March supplement interviews each person once: the March respondents plus the February–April oversamples, about 1.45× a single March.
